Organizations Judge DevOps Success by External Metrics

How Will You Primarily Measure Success of DevOps?

DevOps Benefits Are Real and Quantifiable!

What Has Been the Percentage Improvement, Increase or Reduction for Each of the Quantifiable Benefits You Have Seen?

What You Need to Know

Software development (Dev) is all about change and innovation. IT operations (Ops) is about stability and control. The DevOps methodology recognizes that Dev and Ops are a single continuous process and that integrating the two delivers a huge payback in time-to-market, more customers, greater revenue, and overall software quality.
